Nota di contenuto	Introduction -- Bullying Trends, Correlates, Consequences, and Characteristics -- "Sometimes People Mean?": A Parent's Perspective on Victimization of Children with Special Health Care Needs -- Bullying and Special Populations -- School-based Bullying Prevention Strategies -- Anti-bullying Policies and Advocacy -- Clinical Management of Bullying -- Summation.
Sommario/riassunto	This timely Brief offers up-to-date findings about bullying--from trends and outcomes to assessment and identification--and workable

approaches to combat this social epidemic on multiple fronts. The book examines links between bullying and mental health issues, the complex dynamics between bully and bullied (especially since bullies themselves may be victimized by others), and new challenges presented by youth involvement in social media. Effects of whole-school interventions involving students, teachers, and administrators, on bullying and its consequences, are concisely presented. And clinicians have guidelines for coordinating with children, parents, schools, and the community. Included in the coverage: State statutes and federal anti-bullying efforts. A parent's perspective on the bullying of special-needs children. School-based prevention programs. Bullying and special populations. Parent strategies to reduce cyber-bullying. Best practices for promoting awareness and advocacy. Practical Strategies for Clinical Management of Bullying is an important reference for clinicians, parents, professionals at child-serving agencies and organizations, school administrators and staff, policymakers, and child advocates. Its coverage strikes the right balance between intervention and prevention, with effective methods for helping victims--and bullies--heal.
