

1. Record Nr.	UNINA9910304138103321
Titolo	Evolutionary Perspectives on Social Psychology / / edited by Virgil Zeigler-Hill, Lisa L. M. Welling, Todd K. Shackelford
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-12697-0 3-319-12696-2
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (488 p.)
Collana	Evolutionary Psychology, , 2197-9901
Disciplina	155.7
Soggetti	Personality Difference (Psychology) Cognitive psychology Sex (Psychology) Personality and Differential Psychology Cognitive Psychology Psychology of Gender and Sexuality
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	How can an Understanding of Evolutionary Psychology Contribute to Social Psychology? -- Part I: Social by Design: How Social Psychology can be More Cognitive without Being Less Social -- Social-Cognitive Development from an Evolutionary Perspective -- Modularity -- Evolutionary Psychology and Emotion: A Brief History -- Religiosity -- The Evolution of Social Cognition -- Part II: The Emergent Self -- Evolutionary Perspectives on Social Identity -- Self-Esteem -- Your Sociometer is Telling You Something: How the Self-Esteem System Functions to Resolve Important Interpersonal Dilemmas -- Self-Deception -- Evolutionary Cyberpsychology 2.0: Revisiting Some Old Predictions and Posting Some New Ones in the Age of Facebook -- Part III: Attitudes and Attitudinal Change -- Attitudes: An Evolutionary Perspective -- Conformity: Definitions, Types, and Evolutionary Grounding -- The Darwinian Mystique? Synthesizing Evolutionary

Psychology and Feminism -- Nothing in Human Behavior Makes Sense Except in the Light of Culture: Shared Interests of Social Psychology and Cultural Evolution -- Part IV: Interpersonal Processes -- Prosocial Behavior -- Groups -- Why Do Humans Help Their Friends? Proximal and Ultimate Hypotheses from Evolutionary Theory -- Evolutionary and Social Psychological Perspectives on Human Cooperation -- Language and Communication -- The Evolution of Stereotypes -- A Biosocial Model of Status in Face-to-Face Groups -- Part V: Mating and Relationships -- Attraction and Human Mating -- Evolutionary Developmental Perspectives on Male Androphilia in Humans -- Familial Relationships -- A Life History Approach to the Dynamics of Social Selection -- Part VI: Violence and Aggression -- War and Aggression -- Social Competition and Bullying: An Adaptive Socio-Ecological Perspective -- Dangerous Terrorists as Devoted Actors -- Part VII: Health and Psychological Adjustment -- The Parasite-Stress Theory of Sociality and the Behavioral Immune System -- Happiness -- Part VIII: Individual Differences -- Evolutionary Game Theory and Personality -- Evolutionary Perspectives of Personality -- The Roots of Narcissism: Old and New Models of the Evolution of Narcissism -- Conclusion: Integrating Evolutionary Psychology and Social Psychology: Reflections and Future Directions.

Sommario/riassunto

This wide-ranging collection demonstrates the continuing impact of evolutionary thinking on social psychology research. This perspective is explored in the larger context of social psychology, which is divisible into several major areas including social cognition, the self, attitudes and attitude change, interpersonal processes, mating and relationships, violence and aggression, health and psychological adjustment, and individual differences. Within these domains, chapters offer evolutionary insights into salient topics such as social identity, prosocial behavior, conformity, feminism, cyberpsychology, and war. Together, these authors make a rigorous argument for the further integration of the two diverse and sometimes conflicting disciplines. Among the topics covered: How social psychology can be more cognitive without being less social. How the self-esteem system functions to resolve important interpersonal dilemmas. Shared interests of social psychology and cultural evolution. The evolution of stereotypes. An adaptive socio-ecological perspective on social competition and bullying. Evolutionary game theory and personality. Evolutionary Perspectives on Social Psychology has much to offer students and faculty in both fields as well as evolutionary scientists outside of psychology. This volume can be used as a primary text in graduate courses and as a supplementary text in various upper-level undergraduate courses.
