

1. Record Nr.	UNINA9910304139203321
Autore	Zihl Josef
Titolo	Cerebral Visual Impairment in Children : Visuoperceptive and Visuocognitive Disorders / / by Josef Zihl, Gordon N. Dutton
Pubbl/distr/stampa	Vienna : , : Springer Vienna : , : Imprint : Springer, , 2015
ISBN	3-7091-1815-8
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (346 p.)
Disciplina	150 155 612.8 616.8
Soggetti	Neuropsychology Developmental psychology Neurology Pediatrics Developmental Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- Neurobiological foundations and development of visual perception -- Cognitive functions and their development -- Cerebral visual dysfunctions -- Assessment of visual functions and dysfunctions -- Intervention -- Case reports -- References.
Sommario/riassunto	Cerebral visual disorders have far-reaching consequences for child development. These have profound adverse effects on children's education and success in school and also in later life, but, unfortunately, cerebral visual disorders often remain undiagnosed and untreated in the pediatric population. This book provides a state-of-the-art account of what is known about the development and disorders of visual perception in children. It covers the development and disorders of visual perception in children, their assessment, early intervention and management in an interdisciplinary context, both from a scientific as well as clinical perspective. Case studies illustrate the recommended assessment and rehabilitation procedures; synopses, boxes and check-lists complement the presentation of our

recommendations for clinical practice.
