

1. Record Nr.	UNINA9910304143903321
Autore	Genheimer Hannah
Titolo	Fear and Anxiety in Virtual Reality : Investigations of cue and context conditioning in virtual environment // by Hannah Genheimer
Pubbl/distr/stampa	Wiesbaden : , : Springer Fachmedien Wiesbaden : , : Imprint : Springer, , 2015
ISBN	3-658-08203-8
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (87 p.)
Collana	BestMasters, , 2625-3577
Disciplina	150 155.7 616.89
Soggetti	Clinical psychology Biological psychology Clinical Psychology Biological Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	From classical conditioning to contextual fear conditioning -- Fear conditioning in virtual reality -- Explicit ratings and physiological data. -Contextual conditioning and anxiety disorders.
Sommario/riassunto	Virtual realities provide an outstanding tool in anxiety research. A fear conditioning study investigates and illustrates the development of anxiety disorders in humans. Hannah Genheimer describes the scientific background of fear and anxiety and presents an empirical study in a highly controlled virtual environment. Psychophysiological as well as subjective data on the participants' fear and anxiety clearly show contextual fear conditioning. Cue conditioning in the light of one-trial learning is discussed. The results emphasize the promising application of virtual environments in psychotherapy. Contents From classical conditioning to contextual fear conditioning Fear conditioning in virtual reality Explicit ratings and physiological data Contextual conditioning and anxiety disorders Target Groups Researchers and Students in the field of biological and clinical psychology, neurobiology and behavioral physiology Teachers and concerns focusing on the

development and application of virtual environments, psychotherapists interested in anxiety and anxiety disorders The Author Hannah Genheimer studied Biology and wrote her interdisciplinary master thesis at the Department of Psychology I in Wuerzburg. Currently, she works on the investigation of fear and anxiety in her dissertation project implicating fear conditioning in virtual reality and vagus nerve stimulation.
