Sommario/riassunto	This report, compiled by the International Labour Organization (ILO), documents the proceedings and conclusions of the Symposium on Information Technologies in the Media and Entertainment Industries, held in Geneva from February 28 to March 3, 2000. The symposium focused on the transformative impact of information technologies on employment, working conditions, and labor relations within these industries. Key topics included the rise of multimedia convergence, globalization, new occupational demands, safety and health issues, copyright piracy, and social dialogue. The report highlights the challenges posed by technological advancements, such as job insecurity, the digital divide, and gender inequality, while emphasizing the need for effective policies to promote decent work, equal opportunities, and social protection. It serves as a resource for policymakers, industry professionals, and labor organizations interested in understanding and addressing the implications of technological change in the media and entertainment sectors.
