Sommario/riassunto

Domestic Devotions in Early Modern Italy illuminates the vibrancy of spiritual beliefs and practices which profoundly shaped family life in this era. Scholarship on Catholicism has tended to focus on institutions, but the home was the site of religious instruction and reading, prayer and meditation, communal worship, multi-sensory devotions, contemplation of religious images and the performance of rituals, as well as extraordinary events such as miracles. Drawing on a wide range of sources, this volume affirms the central place of the household to spiritual life and reveals the myriad ways in which devotion met domestic needs. The seventeen essays encompass religious history, the histories of art and architecture, material culture, musicology, literary history, and social and cultural history. Contributors are Erminia Ardissino, Michele Bacci, Michael J. Brody, Giorgio Caravale, Maya Corry, Remi Chiu, Sabrina Corbellini, Stefano Dall'Aglia, Marco Faini, Iain Fenlon, Irene Galandra Cooper, Jane Garnett, Joanna Kostylo, Alessia Meneghin, Margaret A. Morse, Elisa Novi Chavarria, Gervase Rosser, Zuzanna Sarnecka, Katherine Tycz, and Valeria Viola.

Sommario/riassunto	ITiB'2018 is the 6th Conference on Information Technology in Biomedicine, hosted every two years by the Department of Informatics & Medical Devices, Faculty of Biomedical Engineering, Silesian University of Technology. The Conference is organized under the auspices of the Committee on Biocybernetics and Biomedical Engineering of the Polish Academy of Sciences. The meeting has become an established event that helps to address the demand for fast and reliable technologies capable of processing data and delivering results in a user-friendly, timely and mobile manner. Many of these areas are recognized as research and development frontiers in employing new technology in the clinical setting. Technological assistance can be found in prevention, diagnosis, treatment, and rehabilitation alike. Homecare support for any type of disability may

improve standard of living and make people's lives safer and more comfortable. The book includes the following sections: Ø Image Processing Ø Multimodal Imaging and Computer-aided Surgery Ø Computer-aided Diagnosis Ø Signal Processing and Medical Devices Ø Bioinformatics Ø Modelling & Simulation Ø Analytics in Action on the SAS Platform Ø Assistive Technologies and Affective Computing (ATAC)
