Explaining the EU's Influence during the Period 2007 to 2009; Chapter

6. Gradually "Back on Track" (2010-2012): EU Influence on the

Resumed Post-2012 Global Climate Negotiations; The Context: Major

Developments in Global Politics and Climate Science; Key Actors in the

Global Climate Regime and their Positions

The Negotiation Process and the EU's Influence Attempts

Sommario/riassunto

Ever since the first international negotiations on climate change in the early 1990's, the European Union has aspired to play a leading role in global climate politics. This book engages in a longitudinal analysis of the EU's participation in and impact on the United Nations climate regime. It provides not only comprehensive insights into the evolution of EU foreign climate policy, but also a thought-provoking audit of the potential and limits of the EU's influence in a major domain of global affairs.

Sommario/riassunto	The challenge of fighting corruption is strategic at a global and European level, and the inadequacy of the repressive and penal response alone has now been evidenced: corruption must not only be fought, but understood, and preventive administrative measures must be taken. Anti-corruption is not an issue that concerns only the judiciary branch, the legal system, and police authorities, but it is, above all, a challenge for society and institutions as a whole. And it is a challenge to be transformed, in particular, into a change in administrations and institutions, in their way of organizing and operating. This volume the result of the Project "Administrative Prevention through Targeted Anti-corruption MODEls for candidate countries" - APTAMOD, co-funded by the European Union's HERCULE III programme, which has conducted comparative law studies and high-profile research activities in the field of administrative prevention of corruption, with specific focus on Albania, Montenegro, North Macedonia and Serbia.
