Sommario/riassunto	Empirical analysis of two decades of pioneering pension and social security reform in Latin America and the Caribbean shows that much has been achieved, but that critical challenges remain. In tackling this unfinished agenda, a great deal can be learned from the reform experience of countries in the region. Keeping the Promise, produced

by the chief economist's office in the Latin America and Caribbean Region at the World Bank, evaluates policy reforms in 12 countries, points to successes and shortcomings, and proposes priorities and options for future reform. ""Keeping the Promise provides a

Sommario/riassunto	Today's approaches to the study of the human mind are divided into seemingly opposed camps. On one side we find the neurosciences, with their more or less reductionist research programs, and on the other

side we find the cultural and discursive approaches, with their frequent neglect of the material sides of human life. *Persons and their Minds* seeks to develop an integrative theory of the mind with room for both brain and culture. Brinkmann's remarkable and thought-provoking work is one of the first books to integrate brain research with phenomenology, social practice studies and actor-network theory, all of which are held together by the concept of the person.
