Sommario/riassunto	This book presents new developments in Scandinavian memory cultures related to World War II and the Holocaust by combining this focus with

the perspective of history didactics. The theoretical framework of historical consciousness offers an approach linking individual and collective uses and re-uses of the past to the question how history can and should be taught. It also offers some examples of good practice in this field. The book promotes a teaching practice which, in taking the social constructivist notions of historical consciousness as a starting point, can contribute to self-reflecting and critical thinking - being fundamental for any democratic political culture.

»Wegweisend ist in dem Band [...] das Operieren auf unterschiedlichen Ebenen kollektiver Erinnerungen oder, geschichtsdidaktisch gesprochen, die Multiperspektivität, die er eröffnet. Sie konnte Anstoß geben, zukünftig noch starker auch unterhalb der nationalen Ebene auf regionale und kommunale Erinnerungsgemeinschaften, auf neue Medien, auf transnationale ebenso wie auf transregionale Netzwerke der Erinnerung zu blicken, in denen sich die Europaer ihre Geschichtsbilder malen.« Malte Thießen, H-Soz-u-Kult, 05.06.2012

Sommario/riassunto

Is research on antisemitism even necessary in countries with a relatively small Jewish population? Absolutely, as this volume shows. Compared to other countries, research on antisemitism in the Nordic countries (Denmark, the Faroe Islands, Finland, Greenland, Iceland, Norway, and Sweden) is marginalized at an institutional and staffing level, especially as far as antisemitism beyond German fascism, the Second World War, and the Holocaust is concerned. Furthermore, compared to scholarship on other prejudices and minority groups, issues concerning Jews and anti-Jewish stereotypes remain relatively underresearched in Scandinavia - even though antisemitic stereotypes have been present and flourishing in the North ever since the arrival of Christianity, and long before the arrival of the first Jewish communities. This volume aims to help bring the study of antisemitism to the fore, from the medieval period to the present day. Contributors from all the Nordic countries describe the status of as well as the challenges and desiderata for the study of antisemitism in their respective countries.

Nota di contenuto	Chapter 1- Introduction -- Chapter 2- First Order Linear Difference Equations and Patterns of Periodic Solutions -- Chapter 3- Periodic Character of Solutions of First Order Nonlinear Difference Equations -- Chapter 4- Second Order Linear Difference Equations and Periodic Traits -- Chapter 5- Periodic Traits of Second Order Nonlinear Difference Equations -- Chapter 6- Advanced Periodic Characteristics and New Research Questions -- Appendices -- References.
Sommario/riassunto	This textbook on periodic character and patterns of recursive sequences focuses on discrete periodic patterns of first order, second order and higher order difference equations. Aimed toward advanced undergraduate students and graduate students who have taken a basic course in Calculus I and Discrete Mathematics, this book serves as a core text for a course in Difference Equations and Discrete Dynamical Systems. The text contains over 200 exercises to provide readers with a hands-on experience working with the material; the exercises include computations of specific examples and proofs of general results. Readers will receive a first-hand introduction to patterns of periodic cycles and patterns of transient terms with exercises for most sections

of the text, preparing them for significant research work in the area.
