Titolo ISO/IEC/IEEE 41062:2019(E) : ISO/IEC/IEEE International Standard - Software engineering - Recommended practice for software acquisition / / Institute of Electrical and Electronics Engineers

Pubbl/distr/stampa New York, New York : , : IEEE, , 2019

ISBN 1-5044-5529-0

Descrizione fisica 1 online resource (56 pages)

Disciplina 005.14

Soggetti Computer software - Testing

Lingua di pubblicazione Inglese

Formato Materiale a stampa

Livello bibliografico Monografia

Sommario/riassunto A set of useful quality considerations that can be selected and applied during one or more steps in a software acquisition process is described in this recommended practice. The recommended practices can be applied to software that runs on any computer system regardless of the size, complexity, or criticality of the software. The software supply chain may include integration of off-the-shelf (OTS), custom, or free and open source software (FOSS). Each organization or individual using this recommended practice will need to identify the specific quality and activities that need to be included within its acquisition process.
