Sommario/riassunto

Esta obra revela una San Carlos de Bariloche donde coexisten la ciudad turística con otras ciudades no tan visibles para el observador externo: la de las desigualdades, la de la informalidad, la de las disputas por el acceso a la tierra y a entornos de privilegio. Una ciudad donde el Estado está presente a veces en articulación y a veces en conflicto con actores sociales y organizaciones. María Mercedes Di Virgilio dice en el prólogo que «el carácter turístico de la ciudad no solo marca su presente sino que, también, marcó su historia. Resulta novedoso advertir cómo la condición de destino turístico configuró el proceso de urbanización de la ciudad y organizó la dinámica inmobiliaria y, por ende, su morfología actual». El libro invita a abrir las páginas y encontrar una ciudad más compleja y menos bidimensional. Para ello, sociólogos, abogados, trabajadores sociales, arquitectos e historiadores cruzan sus miradas con el objetivo de comprender las dinámicas urbanas de Bariloche de manera interdisciplinaria e integral. This work reveals a San Carlos de Bariloche where the tourist city coexists with other cities not so visible to the external observer: that of inequalities, that of informality, that of disputes over access to land and privileged environments. A city where the State is sometimes present in articulation and sometimes in conflict with social actors and organizations. María Mercedes Di Virgilio says in the prologue that "the tourist character of the city not only marks its present but also marked its history. It is novel to note how the status of tourist destination configured the process of urbanization of the city and organized the real estate dynamics and, therefore, its current morphology". The book invites you to open the pages and find a more complex and less two-dimensional city. For this, sociologists, lawyers, social workers, architects and historians complement their knowledge with the aim of understanding the urban dynamics of Bariloche in an...

Sommario/riassunto	This superb guide brings the work of Filippo Coarelli, one of the most widely published and well-known scholars of Roman topography, archeology and art, to a broad English-language audience. Conveniently organized by walking tours and illustrated throughout with clear maps, drawings, and plans, Rome and Environs: An Archaeological Guide covers all of the major, and an unparalleled number of minor, ancient sites in the city, and, unlike most other guides of Rome, includes major and many minor sites within easy reach

of the city, such as Ostia Antica, Palestrina, Tivoli, and the many areas of interest along the ancient Roman roads. An essential resource for tourists interested in a deeper understanding of Rome's classical remains, it is also the ideal book for students and scholars approaching the ancient history of one of the world's most fascinating cities. • Covers all the major sites including the Capitoline, the Roman Forum, the Imperial Fora, the Palatine Hill, the Valley of the Colosseum, the Esquiline, the Caelian, the Quirinal, and the Campus Martius. • Discusses important clusters of sites-one on the area surrounding Circus Maximus and the other in the vicinity of the Trastevere, including the Aventine and the Vatican. • Covers the history and development of the city walls and aqueducts. • Follows major highways leading outside of the city to important and fascinating sites in the periphery of Rome. • Features 189 maps, drawings, and diagrams, and an appendix on building materials and techniques. • Includes an updated and expanded bibliography for students and scholars of Ancient Rome.
