Sommario/riassunto	In Surrender, Michael Meeropol takes a close look at what actually happened to the American economy during the years of the "Reagan Revolution," revealing with compelling evidence the policies that were truly responsible for the failure to generate rapid growth and other economic improvements. Meeropol gives a detailed account of the inability of the U.S. economy

between 1990 and 1994 to improve productivity or raise incomes for most of the population. He contends that the next recession, certain to begin before the end of 1999, will reveal public policymakers' predictions of balanced budgets and millennial prosperity to be hubris of the highest order.
