

1. Record Nr.	UNINA9910317595603321
Titolo	Agricultural Science // edited by Godwin Aflakpui
Pubbl/distr/stampa	Rijeka, Croatia : , : IntechOpen, , 2012
ISBN	953-51-5287-4
Descrizione fisica	1 online resource (266 pages) : illustrations
Disciplina	572.8
Soggetti	Plant genomes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This book covers key areas in agricultural science, namely crop improvement, production, response to water, nutrients, and temperature, crop protection, agriculture and human health, and animal nutrition. The contributions by the authors include manipulation of the variables and genetic resources of inheritance of quantitative genes, crop rotation, soil water and nitrogen, and effect of temperature on flowering. The rest are protecting crops against insect pests and diseases, linking agriculture landscape to recreation by humans, and small ruminant nutrition. This book is a valuable addition to the existing knowledge and is especially intended for university students and all professionals in the field of agriculture.
