Towards a critical appreciation with emancipatory intent; Epilogue: accounting, emancipation and praxis today; Notes; Bibliography; Index
Sommario/riassunto	Accounting is a social practice: it should be evaluated in terms of its contribution to a notion of social well-being. In order to do this, this book elaborates a critique of contemporary accounting. The authors encourage those with a close interest in accounting to make the search for a more emancipatory and enabling accounting a core area of their interest. The book will stimulate debate and activity in the arenas of education, research, practice and policy-making.

2. Record Nr.	UNINA9910317643903321
Autore	Zahurul Haq Md
Titolo	Applied measurement systems // edited by Md. Zahurul Haq
Pubbl/distr/stampa	IntechOpen, 2012 Rijeka, Croatia : , : IntechOpen, , [2012] ©2012
ISBN	953-51-5639-X
Descrizione fisica	1 online resource (404 pages) : illustrations
Disciplina	530.8
Soggetti	Measurement
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Measurement is a multidisciplinary experimental science. Measurement systems synergistically blend science, engineering and statistical methods to provide fundamental data for research, design and development, control of processes and operations, and facilitate safe and economic performance of systems. In recent years, measuring techniques have expanded rapidly and gained maturity, through extensive research activities and hardware advancements. With individual chapters authored by eminent professionals in their respective topics, Applied Measurement Systems attempts to provide a comprehensive presentation and in-depth guidance on some of the key applied and advanced topics in measurements for scientists, engineers and educators.
