

1. Record Nr.	UNINA9910318354003321
Titolo	IEEE Std 859-2018 (Revision of IEEE Std 859-1987) : IEEE Standard Terms for Reporting and Analyzing Outage Occurrences and Outage States of Electrical Transmission Facilities // IEEE
Pubbl/distr/stampa	New York : , : IEEE, , 2019
ISBN	1-5044-5349-2
Descrizione fisica	1 online resource (24 pages)
Collana	IEEE Std ; ; 859-2018
Disciplina	621.319
Soggetti	Electric power failures Electric lines
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Terminology and indices for reporting and analyzing outage occurrences of transmission facilities are defined in this standard. Outage definitions and indices are given for two general types of facilities: units and components. Units are functional facilities that transfer power between designated points, while components are specific pieces of equipment. Outage definitions are given both for describing the outage history of a particular facility and for describing groups of individual outage occurrences that are related in some way.
