

1. Record Nr.	UNINA9910320957603321
Titolo	IEEE 1588 IEC 61588 First edition 2004-09 : IEEE standard for a precision clock synchronization protocol for networked measurement and control systems (Adoption of IEEE Std 1588-2008) // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York, New York : , : IEEE, , 2004
ISBN	1-5044-5784-6
Descrizione fisica	1 online resource
Disciplina	529.7
Soggetti	Time measurements Computer network protocols - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A protocol is provided in this standard that enables precise synchronization of clocks in measurement and control systems implemented with technologies such as network communication, local computing, and distributed objects. The protocol is applicable to systems communicating via packet networks. Heterogeneous systems are enabled that include clocks of various inherent precision, resolution, and stability to synchronize. System-wide synchronization accuracy and precision in the sub-microsecond range are supported with minimal network and local clock computing resources. Simple systems are installed and operated without requiring the management attention of users because the default behavior of the protocol allows for it.
