Titolo	Spiritual refining, or, A treatise of sinne with its causes, differences, mitigations, and aggravations . Part II [[electronic resource]] : particularly of the desperate deceitfulness of mans heart, of presumptuous and reigning sins, and of hypocrisie and formality in religion : also occasionally handling the uprightness and tenderness of a gracious heart, and therein discovering the nature of a misguided conscience, as also of secret and unknown sins that the best men are guilty of, with directions to the godly under their fears about them : shewing withall that a strict scrutiny into a mans heart and wayes with a holy fear of sinning doth consist with a Gospel-life of faith and joy in the Holy Ghost : all tending to unmask counterfeit Christians, terrifie the ungodly, comfort and direct the doubting saint, humble man, exalt the grace of God : in XLII sermons / / by Anthony Burgess

Sommario/riassunto	Pocos temas han apasionado tanto al público mexicano como el endeudamiento externo de su país. ¿Es verdad que la deuda contraída en Londres después de la independencia hundió a México en la penuria hacendaria y la guerra civil? ¿Qué papel desempeñó la deuda externa en las invasiones extranjeras? Los empréstitos de la época porfiriana ¿fueron benéficos o funestos para México? ¿Qué tan atinados fueron los diversos arreglos de la deuda pública exterior hechos por los gobiernos mexicanos entre la revolución y el fin de la segunda guerra mundial? Éstas y otras preguntas discute la obra presente, publicada por primera vez a fines de 1968 y ahora cuidadosamente corregida y actualizada. El libro tiene 45 cuadros estadísticos en el texto, 15 apéndices igualmente estadísticos y una bibliografía.

Sommario/riassunto	"A framework for overcoming the six types of innovation killersEverybody wants innovation--or do they? Creative People Must Be

Stopped shows how individuals and organizations sabotage their own best intentions to encourage "outside the box" thinking. It shows that the antidote to this self-defeating behavior is to identify which of the six major types of constraints are hindering innovation: individual, group, organizational, industry-wide, societal, or technological. Once innovators and other leaders understand exactly which constraints are working against them and how to overcome them, they can create conditions that foster innovation instead of stopping it in its tracks. The author's model of constraints on innovation integrates insights from the vast literature on innovation with his own observations of hundreds of organizations. The book is filled with assessments, tools, and real-world examples. The author's research has been featured in the New York Times, Wall Street Journal, London Guardian and San Jose Mercury News, as well as on Fox News and on NPR's Marketplace. Includes illustrative examples from leading organizations. Offers a practical guide for bringing new ideas to fruition even within a previously rigid organizational culture. This book gives people in organizations the conceptual framework and practical information they need to innovate successfully"--

Sommario/riassunto	This book introduces recent advances in understanding the crystal structure of carbonate hydroxylapatite (also known as bone mineral), which forms the hard tissue of bones and teeth. Bone mineral is the reservoir for carbon dioxide in the body and maintains the concentration of mineral ions in body fluids at homeostasis. The detailed structure of bone mineral has remained obscure more than 80 years after publication of the basic apatite structure, due to the nanoscale size and poor quality of bone mineral crystals. An entirely new approach to the determination of carbonate apatite structures h
