Sommario/riassunto	"International journal of mechanical sciences is an international forum for the publication and dissemination of original work which contributes to the understanding of the main disciplines underpinning the mechanical and civil engineering sciences. Original contributions giving insight into engineering practices in structural mechanics (vibration, buckling and deformation of metal and composite structures, smart structures), mechanics and applications of advanced materials (composite, cellular, smart), fluid mechanics (internal flows, tribology) thermodynamics and materials processing analysis form the core of the journal contents."
