

1. Record Nr.	UNINA9910333248803321
Titolo	Transportation research . Part C Emerging technologies [[e-journal]]
Pubbl/distr/stampa	[Oxford ; ; New York], : Pergamon, 1993-
ISSN	1879-2359
Soggetti	Transportation Transportation - Technological innovations Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Title from contents screen (ScienceDirect, viewed Nov. 22, 2005). "An international journal." Some issues also have distinctive theme titles. Imprint varies: Orlando : Elsevier Inc., <2005-> Refereed/Peer-reviewed
Sommario/riassunto	"The focus of Transportation research: Part C is high-quality, scholarly research that addresses development, applications, and implications, in the field of transportation, of emerging technologies from such fields as operations research, computer science, electronics, control systems, artificial intelligence, and telecommunications, among others. The interest is not in the individual technologies or methodologies per se, but in their ultimate implications for the planning, design, operation, control, management, maintenance and rehabilitation of transportation systems, services and components. Of particular interest are the impacts of emerging technologies on transportation system performance, in terms of level of service, capacity, safety, reliability, resource consumption and the environment, economics and finance, privacy, standards, and liability."
