

1. Record Nr.	UNINA9910337464403321
Titolo	Energy Geotechnics : SEG-2018 // edited by Alessio Ferrari, Lyesse Laloui
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-99670-3
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (515 pages)
Collana	Springer Series in Geomechanics and Geoengineering, , 1866-8763
Disciplina	333.88
Soggetti	Engineering geology Geotechnical engineering Geoengineering Geotechnical Engineering and Applied Earth Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Energy geostructures and shallow energy geostorage -- Thermo-hydro-chemo-mechanical behaviour of geomaterials -- Unconventional resources, hydraulic stimulation and induced seismicity -- CO2 geological storage and nuclear waste disposal -- Others geotechnical activities related to the energy sector.
Sommario/riassunto	This book collects selected full papers presented at the International Symposium on Energy Geotechnics 2018 (SEG-2018), held on 25th – 28th September 2018, at the Swiss Federal Institute of Technology in Lausanne (EPFL). It covers a wide range of topics in energy geotechnics, including energy geostructures, energy geostorage, thermo-hydro-chemo-mechanical behaviour of geomaterials, unconventional resources, hydraulic stimulation, induced seismicity, CO2 geological storage, and nuclear waste disposal as well as topics such as tower and offshore foundations. The book is intended for postgraduate students, researchers and practitioners working on geomechanics and geotechnical engineering for energy-related applications.
