Kuzmiak Pubbl/distr/stampa Cham:,: Springer International Publishing:,: Imprint: Springer,, 2019 **ISBN** 3-030-13402-4 Edizione [1st ed. 2019.] Descrizione fisica 1 online resource (183 pages) 616.99449075 Disciplina 616.99449 Soggetti Interventional radiology Interventional Radiology Lingua di pubblicazione Inglese Materiale a stampa **Formato** Livello bibliografico Monografia Chapter 1 – Interventional Procedures: Patient Centered Approach --Nota di contenuto Chapter 2 – Ultrasound Guided Procedures -- Chapter 3 – DBT Guided Biopsy -- Chapter 4 - Mammographically-Guided Procedures --Chapter 5 - MRI -quided Biopsy Procedures -- Chapter 6 - Radiology-Pathology correlation. This book provides a comprehensive description and explanation of Sommario/riassunto how to perform image-guided percutaneous procedures of the breast and how to manage the results. The authors of the book are expert radiologists trained in breast imaging and are dedicated to patient care and teaching. The intent of this book is that it is used as an educational tool to help develop interventional breast procedural skills and how to apply them in a clinical setting. The book is unique in that it pertains exclusively to percutaneous image-guided breast procedures with a patient-centered focus. Each image modality will be discussed in a separate chapter – ultrasound, mammography, and MRI. Also included is a dedicated chapter focusing on the novel technique of digital breast tomosynthesis-guided procedures. To conclude the book, there is a chapter devoted to radiology/pathology concordance with lesion management. This is an ideal guide for practicing radiologists and physicians in training.
