| Titolo | Salivary Gland Cancer : From Diagnosis to Tailored Treatment // edited by Lisa Licitra, Laura D. Locati |
| Pubbl/distr/stampa | Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019 |
| ISBN | 3-030-02958-1 |
| Edizione | [1st ed. 2019.] |
| Descrizione fisica | 1 online resource (224 pages) |
| Disciplina | 616.31 616.994316 |
| Soggetti | Oncology Otolaryngologic surgery Radiotherapy Oncology Head and Neck Surgery |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di contenuto | Management-Based Pathology Assessment of Salivary Gland Carcinomas -- Molecular characterization of salivary gland carcinomas -- The role of imaging in staging and follow-up of salivary gland tumors -- Surgery for malignant parotid gland tumours -- Surgery for Submandibular and Sublingual Malignant Tumors -- Surgery for malignant tumours of the minor salivary glands -- Surgical Management of Recurrent Disease -- Principles of Reconstruction: Reconstruction of the Parotid Area -- Principles of Reconstruction: Palato-Maxillary Reconstruction -- Salivary gland tumors: Radiotherapy -- Protons and Heavy Ions -- Systemic therapy in salivary glands carcinoma. |
| Sommario/riassunto | This clinically oriented book provides a comprehensive update on the biology, diagnosis, and treatment of salivary gland cancer. Detailed information is presented on molecular characterization and radiological staging, and a series of treatment-related chapters describe the different surgical approaches to major and minor salivary gland cancer, including reconstructive surgery techniques, and the roles of |

radiotherapy and heavy ion therapy. Rehabilitation, follow-up, and the management of metastatic disease are also fully discussed. The aim is to equip the reader with the knowledge required to deliver appropriate tailored treatment in each patient, based on tumor characteristics and other pertinent factors. An additional feature is the inclusion of information on advocacy groups and their perspectives. All of the chapters are written by leading specialists in the field. In presenting the most recent advances and innovations in diagnosis and therapy and relating them to individualized treatment, this book will appeal to a wide audience including otorhinolaryngologists, head and neck surgeons, maxillofacial surgeons, radiation oncologists, and other clinicians.
