

1. Record Nr.	UNINA9910779207603321
Autore	Eriksen Karen <1956->
Titolo	Beyond the DSM story [[electronic resource]] : ethical quandaries, challenges, and best practices / Karen Eriksen, Victoria E. Kress
Pubbl/distr/stampa	Thousand Oaks, Calif. ; ; London, : SAGE, 2005
ISBN	1-4522-0458-6 1-4522-2218-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xv, 259 p.)
Altri autori (Persone)	KressVictoria E
Disciplina	616.89075
Soggetti	Mental illness - Diagnosis Mental illness - Classification
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 211-245) and index.
Nota di contenuto	Cover; Contents; Acknowledgments; Introduction; Chapter 1 - The Price of Diagnosis; Chapter 2 - Ethics Meets Diagnosis; Chapter 3 - Multicultural Challenges to the DSM; Chapter 4 - Feminist Challenges to DSM Diagnosis; Chapter 5 - Toward Resolving the Quandaries and Pursuing Ethical and Contextually Sensitive Diagnostic Practice; Chapter 6 - The Case of 9-Year-Old Janelle and Her Mother; Chapter 7 - The Case of Ana and Mark; Chapter 8 - The Case of Ellen; Chapter 9 - A Developmental, Constructivist Model for Ethical Assessment (Which Includes Diagnosis, of Course); Afterword; References IndexAbout the Authors; About the Contributors
Sommario/riassunto	Challenges the 'Diagnostic & Statistical Manual' system from ethical & cultural perspectives, with a critical evaluation of how it fits with other professional & theoretical orientations.

2. Record Nr.	UNINA9910337486503321
Titolo	Instruments for Health Surveys in Children and Adolescents / / edited by Karin Bammann, Lauren Lissner, Iris Pigeot, Wolfgang Ahrens
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-98857-3
Edizione	[1st ed. 2019.]
Descrizione fisica	XVI, 301 p. : gráf. ; ; 25 cm
Collana	Springer Series on Epidemiology and Public Health, , 1869-7933
Disciplina	614.42
Soggetti	Statistics Epidemiology Health promotion Diet therapy Clinical health psychology Statistics for Life Sciences, Medicine, Health Sciences Health Promotion and Disease Prevention Clinical Nutrition Statistics for Social Sciences, Humanities, Law Health Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa

Nota di bibliografia	Incluye referencias bibliográficas e índice
Nota di contenuto	0 Preface -- 1 The IDEFICS/I.Family studies: design and methods of a large European child cohort -- 2 MODYS – a modular control and documentation system for epidemiological studies -- 3 Physical examinations -- 4 Biological samples – Standard Operating Procedures for collection, shipment, storage and documentation -- 5 Web-based 24-Hour Dietary Recall: the SACANA program -- 6 Dietary behaviour in children, adolescents and families: the Eating Habits Questionnaire (EHQ) -- 7 Accelerometry-based physical activity assessment for children and adolescents -- 8 Pre- and post-natal factors obtained from health records -- 9 Core questionnaires -- 10 Instruments for assessing the role of commercials on children's food choices -- 11 Process evaluation of the IDEFICS intervention -- 12 Assessment of sensory taste perception in children -- 13 Physical fitness -- 14

Interview on kinship and household.

Sommario/riassunto

This book describes key methods and instruments for assessing diet-related factors, physical activity, social and environmental factors, physical characteristics and health-related outcomes in children and adolescents. These tools were developed and deployed within the framework of the pan-European IDEFICS and I.Family cohort studies. These population-based field studies were funded within the 6th and 7th European Framework Programme, respectively, and were intended to assess the prevalence and aetiology of lifestyle-related diseases in children, focusing on overweight and obesity, and to develop effective strategies for primary prevention. In the course of a decade we undertook a major research endeavour, collecting standardised data from children, families, neighbourhoods, kindergartens, pre-schools and schools in eight European countries, employing a uniform cross-cultural methodology. This resulted in a rich picture of the daily lives and living contexts of children and their families. Studies encompassing childhood and adolescence face the particular challenge of the transitions from pre-school to primary school and from childhood to adolescence; accordingly, the instruments used need to be adapted to different developmental stages while maintaining their comparability across the age range. In young children, questionnaires have to be completed by proxies, usually their parents, while older children, particularly adolescents, can provide a major part of the requested information themselves. This book presents suitable designs, methods and instruments for data collection in studies of children and adolescents. Each chapter explains the development and background of the instruments applied in the surveys and summarises the current state of knowledge. All chapters were written by key experts in their respective research fields. We are grateful for their valuable contributions and their enthusiastic support in producing this book, which also presents survey experiences in which practice does not always follow theory. Participants' responses can on occasion be unexpected and unpredictable, but meeting these challenges can also enrich epidemiological surveys and yield methodological refinements. We sincerely hope that the book and the online material will be of considerable value to other research teams.
