Sommario/riassunto

Comprehensively covering various techniques such as ERCP, EUS, EST and lithotripsy, this book highlights innovative endoscopic surgical techniques for managing pancreatoco-biliary. It will provide readers an extensive overview of the therapeutic endoscopy management solutions and techniques currently available. Advanced Therapeutic Endoscopy for Pancreatoco-Biliary Diseases was written by pioneering experts from around the world, providing a concise yet comprehensive summary of the current state of therapeutic endoscopic techniques in a step-by-step format. Each chapter examines both major and subtle yet important techniques, together with new findings, an approach that will appeal to a broad readership, from beginning to advanced endoscopists and surgeons with a background in gastroenterology, particularly those specializing in endoscopy of pancreatoco-biliary diseases to help guide patient management.
