

1. Record Nr.	UNINA9910337491903321
Titolo	Clinical Epidemiology of Chronic Liver Diseases / / edited by Robert J. Wong, Robert G. Gish
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-94355-3
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (349 pages)
Disciplina	614.4273
Soggetti	Hepatology Gastroenterology Epidemiology Pharmacy management Pharmacoconomics and Health Outcomes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- Principles of Clinical Epidemiology.-- Understanding Study Design for Clinical Epidemiology Studies -- Understanding the Interpretation of Disease Incidence and Prevalence -- Understanding Survival Analyses -- Epidemiology of Liver Disease – Worldwide Perspective -- Epidemiology of Liver Disease in the U.S -- Alcoholic Liver Disease -- Hepatitis B Virus – The Asian Perspective -- Hepatitis B Virus – The African Perspective -- Hepatitis B Virus – Western Perspective -- Hepatitis D Virus -- Hepatitis C Virus -- Hepatitis A and Hepatitis E Virus -- Nonalcoholic Fatty Liver Disease -- Hepatocellular Carcinoma -- Autoimmune Liver Diseases and Cholestatic Liver Diseases -- Genetic and Inherited Liver Diseases -- Cryptogenic Liver Diseases and other -- Summary.
Sommario/riassunto	This book emphasizes the clinical epidemiology of chronic liver diseases with a specific focus on the methodology of the discussed studies. The whole spectrum of liver diseases is covered, from chronic hepatitis B and C, to hepatocellular carcinoma, alcoholic and non-alcoholic fatty liver diseases and autoimmune and cholestatic liver diseases. Readers will find the most up-to-date information on clinical

epidemiology of hepatology, and will also be able to learn about important methodology and biostatistics information. Each chapter contains a summary table at the end of each chapter that highlights the most relevant landmark studies, their main outcomes and the unique features of the methodology. The book will appeal to both practicing clinicians as well as clinical research investigators. In addition, this would likely be of interest to medical school or public health school students to learn about hepatology epidemiology, but also some specific fundamentals of clinical research and clinical epidemiology. .
