Titolo	Rotator Cuff Across the Life Span : ISAKOS Consensus Book / / edited by Andreas B. Imhoff, Felix H. Savoie III
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2019
ISBN	3-662-58729-7
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (500 pages)
Disciplina	617.572059
Soggetti	Orthopedics Sports medicine Surgical Orthopedics Sports Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Basic -- The young athletic high risk patient (age 10-30) -- Rotator cuff in the middle ages (age 30-50) -- Rotator cuff in the “older” patient (age 50-70) -- Rotator cuff in old patients (age> 70) -- Miscellaneous -- Complications.
Sommario/riassunto	This book presents the consensus findings of the ISAKOS Shoulder Committee regarding the treatment options in patients suffering from shoulder pain and reduced function or dead arm syndrome as a consequence of rotator cuff injuries. The aim is twofold: to equip readers with a precise knowledge of the presenting characteristics of these injuries in different age groups and to describe in detail the initial management and surgical and non-surgical approaches, taking into account the age-specific features. Readers will find clear descriptions of all the latest arthroscopic techniques, which allow repair of even the largest tears. The indications for and performance of tendon transfer procedures, biceps tenotomy, tenodesis, hemiarthroplasty, anatomic shoulder arthroplasty, reverse total shoulder arthroplasty, and revision surgery are explained. Helpful guidance is also provided on the use of strategies to promote rotator cuff healing, including stem cell therapy and scaffolds. The authors are leading experts in the field, and the book will be of value for all shoulder surgeons and orthopaedic trainees

and consultants, as well as sports medicine specialists.
