

1. Record Nr.	UNINA9910337498703321
Titolo	Humoral Primary Immunodeficiencies // edited by Mario Milco D'Elcios, Marta Rizzi
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-91785-4
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (383 pages)
Collana	Rare Diseases of the Immune System, , 2282-6505
Disciplina	616.979
Soggetti	Rheumatology Immunology Infectious diseases Oncology Infectious Diseases Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Preface -- 1. B cells and the B-cell immunological synapse.-2 Mucosal B cells -- 3 CVID. – 4 LOCID. – 5 Genetics of CVID. – 6 ICOS deficiency. – 7 CD19 deficiency -- 8 CD20 deficiency. – 9 CD21 deficiency. – 10 CD81 deficiency. - 11 TACI deficiency, . – 12 LRBA deficiency. – 13 BAFF receptor deficiency. – 14 TWEAK defects. - 15 NFKB2 deficiency. – 16 WHIM syndrome. – 17 Novel humoral PID genes. – 18 Class Switch Recombination defects, -- 19 Selective IgA deficiency -- 20 IgA with IgG subclass deficiency. - 21 Isolated IgG subclass deficiency. – 22 Thymoma with immunodeficiency. – 23 PRKC delta and PI3K-delta associated diseases. – 24 Differential diagnostic in hypogammaglobulinemia. – 25 Management of Humoral primary immunodeficiencies in pediatrics -- 26 Management of Humoral primary immunodeficiencies in adults -- 27 Vaccines in humoral PID -- 28 Humoral PID and neoplasias -- 29 Humoral PID and autoimmunity. – 30 Lung involvement -- 31 Gut involvement -- Subject Index.
Sommario/riassunto	This book presents detailed state of the art knowledge on the humoral primary immunodeficiencies (PIDs), i.e., disorders arising from impaired

antibody production due to defects intrinsic to B cells or defective interaction between B and T cells. There is extensive coverage of both basic science discoveries and the latest clinical advances in the field. The book is structured in accordance with the most recent classification of PIDs and also covers updates on the B cell immunological synapse. Readers will find comprehensive, in-depth descriptions of novel humoral PID genes and related clinical applications, mucosal B cells, and the various clinical phenotypes of humoral PIDs. Aspects such as differential diagnosis, clinical management in children and adults, and the role of vaccines are also addressed. The authors are all recognized experts from Europe, Australia, and the United States. Humoral Primary Immunodeficiencies will be of high value for immunologists, pediatricians, rheumatologists, oncologists, internists, and infectious disease specialists and will also be informative for MD and PhD students.
