Sommario/riassunto	This book examines the lives and ideas of Mohandas K. Gandhi and Osama bin Laden. Can both men be equally 'religious' figures? How can the religious philosophy of nonviolence respond to its nemesis, which takes life easily and casually? Abdul Ghaffar Kahn, a nonviolent representative of Islam, is also discussed.

Sommario/riassunto

This book comprehensively covers unusual and rare pathological cases in echocardiography. Chapters cover cases from diagnosis, to treatment and prognosis with engaging video clips including three dimensional video clips to enhance appreciation and understanding of echocardiography use in clinical practice. Cases covered include: pseudoaneurysm of aortic graft, congenital absence of pericardium, coarctation of aorta and patent ductus arteriosus. Clinical Cases in the Echocardiography Lab features comprehensive overviews of a wide range of rare pathologies in echocardiography, and is an essential resource for both the novice and experienced cardiology practitioner. .
