Are there innovative therapies we can explore? -- Chapter 10. Perspectives from health care providers local to global: Words of wisdom. Personal reflections of caring for late preterm infants -- Chapter 11. The alternative facts about late preterm infants: You mean there are fake stories about me? -- Conclusion.
Sommario/riassunto	This volume analyses the distinct care needs of late preterm infants and their parents by reflecting on the best available evidence to inform on

practice and latest innovations in care. It addresses the spectrum of issues experienced by late preterm infants and their parents to ensure their health life trajectories. We define late preterm infants as those born between 34 0/7 to 36 6/7 weeks' gestational age. The book uses creative writing prompts and a narrative style to gain insight and self-reflection in and on practice to move the reader to embracing best practices. Issues such as mother's physical and emotional health, father's burden in postpartum period and neurodevelopmental outcomes of late preterm infants are specifically addressed. Areas of innovation are shared for consideration to prompt readers thinking about continuous improvement in quality of care. The book shares local and global perspectives to address the common concerns related to care of late preterm infants and their families, and to foster a partnership in promoting their health all across the globe. It is intended to any health care providers such as nurses, midwives, physicians and other allied care professionals like health visitors, community health workers.
