

1. Record Nr.	UNINA9910337506703321
Titolo	Psychosocial Care of End-Stage Organ Disease and Transplant Patients // edited by Yelizaveta Sher, José R. Maldonado
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-94914-4
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (545 pages)
Disciplina	617.95
Soggetti	Psychiatry Surgical transplantation Pain medicine General practice (Medicine) Transplant Surgery Pain Medicine General Practice / Family Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Evaluation of the Recipient -- Evaluation of the Live Donor -- End-stage cardiac illness and indications for heart transplantation -- Mental health in chronic and end-stage heart disease -- ICDs, VADs, and total artificial hearth implantation -- History of heart transplantation -- Medical course and complications after heart transplantation -- Post-transplant psychosocial and mental health care of cardiac patient -- End-stage pulmonary disease and indications for pulmonary transplantation -- Mental health in chronic and end-stage pulmonary disease -- ECMO -- History of lung transplantation -- Medical course and complications after lung transplantation -- Post-Transplant psychosocial and mental health care of pulmonary patient -- End-stage liver disease and indications for liver transplantation -- Mental health in chronic and end-stage liver disease -- History of liver transplantation -- Medical course and complications after liver transplantation -- Post-Transplant psychosocial and mental health care of liver patient -- End-stage renal

disease and indications for renal transplantation -- Mental health in chronic and end-stage renal disease -- History of renal transplantation -- Medical course and complications after renal transplantation -- Post-Transplant psychosocial and mental health care of renal patient -- Indications for small bowel and pancreas transplantation -- Mental health in chronic and end-stage GI disease -- TPN -- History of GI transplantation -- Medical course and complications after GI transplantation -- Post-Transplant psychosocial and mental health care of GI patient -- Uterus transplantation -- Penile -- Face -- Extremities -- Bone marrow malignancy and indications for bone marrow transplantation -- Mental health prior to BMT -- History of bone marrow transplantation -- Medical course and complications after bone marrow transplantation -- Post-Transplant psychosocial and mental health care of the BMT patient -- Psychopharmacology in transplant patient -- Psychotherapy in transplant patient -- Support groups and other social needs, treatments, and interventions -- Substance abuse in transplant patient -- Ethical considerations in transplant patient -- Cross-Cultural Issues -- How to Build a Successful Integrated -- Psychosocial Care Transplant Practice. .

Sommario/riassunto

This book takes an integrated, evidence-based approach teaching students and updating practicing physicians about the psychosocial care of transplant patients. Unlike any other text currently on the market, this title presents the core principles of transplant psychiatry through an organ-based structure that includes the heart, lungs, liver, GI organs, kidney, composite tissue, and other key areas of transplantation. Each section is divided into chapters discussing topics relevant for the psychosocial and surgical caregivers considerations prior to and post-transplant, such as the history of care and the psychosocial aspects prior, during and after transplant. The text ends with special topics in care, including psychopharmacology, substance abuse, psychosocial evaluation of recipients and donors, ethical considerations, cross-cultural aspects, and building the transplant psychiatry practice. It includes excellent learning tools, such as key points, summary sections, and review questions. Written by interdisciplinary experts, Psychosocial Care of End-Organ Disease and Transplant Patients is a valuable resource for students and medical professionals interested in psychiatry, psychology, psychosomatic medicine, transplant surgery, internists, hospital administrators, pharmacists, nurses, and social workers.
