

1. Record Nr.	UNISALENTO991003634529707536
Titolo	Commutative algebra and its interactions to algebraic geometry [e-book] : VIASM 2013-2014 / Nguyen Tu Cuong, Le Tuan Hoa, Ngo Viet Trung, editors
ISBN	331975565X 9783319755656 3319755641 9783319755649
Descrizione fisica	1 online resource (ix, 256 pages) : illustrations
Collana	Lecture notes in mathematics, 0075-8434 ; 2210
Classificazione	AMS 14-06 LC QA251.3
Altri autori (Persone)	Brodmann, Markus P. Cuong, Nguyen Tuauthor Elias, Juan Hoa, Le Tuanauthor Miró-Roig, Rosa M. Morales Ibarra, Marcel Trung, Ngo Viet
Disciplina	516.35
Soggetti	Associative rings Commutative algebra Commutative rings Differential equations, Partial Geometry, Algebraic
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references
Nota di contenuto	Notes on Weyl algebra and D-modules / Markus Brodmann. Inverse systems of local rings / Juan Elias. Lectures on the representation type of a projective variety / Rosa M. Miró-Roig. Simplicial toric varieties which are set-theoretic complete intersections / Marcel Morales
Sommario/riassunto	"This book presents four lectures on recent research in commutative algebra and its applications to algebraic geometry. Aimed at

researchers and graduate students with an advanced background in algebra, these lectures were given during the Commutative Algebra program held at the Vietnam Institute of Advanced Study in Mathematics in the winter semester 2013 -2014. The first lecture is on Weyl algebras (certain rings of differential operators) and their D-modules, relating non-commutative and commutative algebra to algebraic geometry and analysis in a very appealing way. The second lecture concerns local systems, their homological origin, and applications to the classification of Artinian Gorenstein rings and the computation of their invariants. The third lecture is on the representation type of projective varieties and the classification of arithmetically Cohen-Macaulay bundles and Ulrich bundles. Related topics such as moduli spaces of sheaves, liaison theory, minimal resolutions, and Hilbert schemes of points are also covered. The last lecture addresses a classical problem: how many equations are needed to define an algebraic variety set-theoretically? It systematically covers (and improves) recent results for the case of toric varieties"--Print version, page 4 of cover

Nota di contenuto	<p>Preface -- I Acne -- Etiology, Pathophysiology, and Nosology of Acne.- Prevalence -- A Precipitous Pathogenesis.-Anatomy of Follicles.- Epidermal Lipids -- Sebaceous Glands, Micro-organisms -- Endocrinology of Acne.-The Evolution of the Comedo.-Dynamics of Primary Comedo Formation -- Dynamics of Secondary Comedo Formation -- Dynamics of Inflammation, Inflammatory Lesions and Sequels.-Scope of Scar -- Classification of Acne -- Acne in Animals: Canine and Feline Acne.-Animal Models -- Human Sebocyte Culture, Acne in Childhood, Acne Comedonica (Comedonal Acne) -- Acne Papulopustulosa (Papulopustular Acne) -- Acne Conglobata -- Acne Inversa.-Acne Fulminans -- SAPHO Syndrome -- Solid Facial Persistent Edema in Acne -- Acne Mechanica -- Back Acne -- Acne Tropicalis (Tropical Acne) -- Postadolescent Acne in Women -- Premenstrual Acne -- Perimenopausal and Postmenopausal Acne -- Polycystic Ovary Syndrome and SAHA Syndrome -- Congenital Adrenal Hyperplasia -- Cushing Syndrome.-Androgen Excess, Excoriations -- Acne Venenata, Chloracne.-Solar Comedones (Favre-Racouchot Disease -- Acne Aestivalis (Mallorca Acne) -- Radiation-induced Comedones, PAPA Syndrome -- Ectrodactyly, Soft-tissue Syndactyly, and Nodulocystic Acne -- Apert Syndrome -- Familial Dyskeratotic Comedones -- Haber Syndrome -- Acne-free Nevus and Clonal Acne -- Atrophoderma Vermiculata, Acneiform Eruptions -- Steroid Acne -- Amineptine Acne -- Ecstasy Pimples -- II Rosacea -- Prevalence -- Etiology and Pathogenesis -- Clinical Findings of Rosacea -- Histopathology of Rosacea -- Laboratory Findings of Rosacea -- Differential Diagnosis of Rosacea -- Treatment of Rosacea -- III Acne-like Disorders -- Perioral Dermatitis -- Demodex folliculorum -- Gram-negative Folliculitis -- Necrotizing Lymphocytic Folliculitis (Acne Necrotica) -- Sebaceous Gland Hyperplasia -- Steatocystoma Multiplex -- Steatocystoma Simplex -- Eruptive Vellus Hair Cysts -- Nevus Comedonicus -- Dilated Pore -- Pilar Sheath Acanthoma -- Omphalolith: The Ugly Navel -- Keratosis Pilaris -- Pseudofolliculitis Barbae -- Osteoma Cutis -- Minocycline-induced Hyperpigmentation -- IV Treatment of Acne -- History of Therapy: Past, Present and Future -- Strategic Approaches to the Treatment of Acne -- Topical Treatment -- Systemic Treatment -- Physical Therapy -- V Miscellaneous -- X-Ray Therapy: A Historical Note -- Dermabrasion -- Excision -- Punch-Graft Elevation or Punch-Graft Transplant -- Dermal Filler Substances: Collagen -- Camouflage -- Psychosocial Aspects of Acne -- Spontaneous Involution of Acne -- Subject Index.</p>
Sommario/riassunto	<p>This book is a richly illustrated account of the clinical features, microscopic anatomy, and management of acne, acne-like disorders, and rosacea. The coverage includes all aspects of these diseases, from physiology to pathology, bacteriology, and endocrinology; special emphasis is placed on histopathology. Moreover, the full spectrum of pharmacological and physical methods of controlling the disorders are critically examined and the widely experienced team of authors present in detail their personal strategies for successful treatment. Since it was first published, Acne and Rosacea has become a well-known classic. This fourth edition has been completely revised and updated, with entirely new chapters on topics such as etiopathogenesis, auto-inflammatory acne syndromes, the role of nutrition, and novel therapies. The text is supplemented by selected references and a wealth of clinical and histopathological pictures, including additional</p>

high-definition photographs. The book is designed for all those physicians – dermatologists, general practitioners, pediatricians, gynecologists, pharmacologists, and surgeons – who must identify and treat the many different forms of acne and rosacea.
