

1. Record Nr.	UNINA9910337512903321
Titolo	Atlas of Adrenal Surgery // edited by Alexander Shifrin
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-01787-7
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (91 pages)
Disciplina	617.461
Soggetti	Minimally invasive surgery Cancer - Surgery Urology Minimally Invasive Surgery Surgical Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Transabdominal Laparoscopic Left Adrenalectomy -- Laparoscopic Right Adrenalectomy (Transperitoneal Approach) -- Laparoscopic Transabdominal Right Adrenalectomy -- Laparoscopic Transabdominal Left Adrenalectomy -- Right Posterior Retroperitoneoscopic Adrenalectomy -- Left Posterior Retroperitoneal Endoscopic Adrenalectomy -- Posterior Retroperitoneoscopic Right Cortical-Sparing Adrenalectomy -- Left Robotic Transperitoneal Adrenalectomy -- Right Robotic Transperitoneal Adrenalectomy -- Right Transabdominal Robotic Adrenalectomy. .
Sommario/riassunto	This book is designed to illustrate different techniques on how to perform successful adrenalectomies by using different approaches. It is written by renowned endocrine surgeons and includes techniques of adrenalectomy by using laparoscopic transperitoneal, posterior retroperitoneal, and robotic approaches. Each procedure includes right and left adrenalectomy. Chapters begin with a case description that defines the main aspect of surgery. Each picture, which is taken intraoperatively, is accompanied by corresponding drawings for easier understanding of the anatomical structures and steps of the procedure. In addition, annotated videos of procedures are available to supplement

the material. The book also provides common pitfalls of the procedure in order to avoid complications and improve patient outcomes. The Atlas of Adrenal Surgery offers an indispensable source of knowledge to all surgeons, those who just started their career and those who are in the more advanced stages of their practice and are learning new techniques of adrenalectomy.
