

1. Record Nr.	UNINA9910337515703321
Titolo	Surgical Pathology of Non-neoplastic Gastrointestinal Diseases // edited by Lizhi Zhang, Vishal S. Chandan, Tsung-Teh Wu
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-15573-0
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (IX, 572 p. 523 illus., 520 illus. in color.)
Disciplina	616.07 616.3307
Soggetti	Pathology Gastroenterology Gastroenterology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Normal Histology of Gastrointestinal Tract -- Endoscopy, Tissue processing, Stains and Special Tests -- Reflux Esophagitis and Barrett Esophagus -- Eosinophilic Esophagitis -- Drugs-induced Injury, Infections, Congenital, and Miscellaneous Disorders -- Common Types of Gastritis -- Special Forms of Gastritis -- Drugs-Induced Injury, Infections, Vascular, Congenital, and Miscellaneous Disorders -- Malabsorption and Malnutrition Disorders -- Other Inflammatory Disorders of Duodenum -- Infectious Disorders of Duodenum and Small Bowel -- Drugs-induced Injury, Poylps, Congenital and Miscellaneous Disorders -- Inflammatory Bowel Disease -- Drug-Induced Injury, Vascular, Congenital, and Miscellaneous Disorders -- Inflammatory Bowel Disease -- Non-Inflammatory Bowel Disease Colitis -- Infectious Disorders of the Colon -- Drugs-induced Injury, Vascular, Congenital, Motility, Polyps and Miscellaneous Disorders -- Non-Neoplastic Diseases of Appendix -- Non-Neoplastic Diseases of Anus.
Sommario/riassunto	This book covers the entire spectrum of non-neoplastic diseases within the gastrointestinal (GI) tract including new entities, recent developments, and questions that arise in the practice of GI pathology. The text is organized by specific organ site, with related disorders of each organ site subgrouped into several chapters based on their

common features. Pathologists can quickly find the disorders they are interested and review similar disorders in the same chapter to help them make a correct diagnosis. Each major and common entity is described in detail with its definition, clinical features, pathological features (covering both the gross and microscopic details), differential diagnosis and treatment/prognosis. All chapters also highlight the use of special/immunohistochemical stains and other supporting studies as needed with a focus on providing a practical differential diagnosis rather than just a list of potential associations. This book is extensively illustrated with both gross and microscopic images that act as an integral part of the information provided in the text. Written by practicing GI/liver pathologists and gastroenterologists from the Mayo Clinic, *Surgical Pathology of Non-neoplastic Gastrointestinal Diseases* serves as a comprehensive yet practical guide for diagnostic surgical pathologists with a passion for GI pathology.
