Autore	Nasr Michel R.
Titolo	Lymph Node Pathology for Clinicians / / by Michel R. Nasr, Anamarija M. Perry, Pamela Skrabek
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-11515-1
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (217 pages)
Collana	Pathology for Clinicians, , 2570-3382
Disciplina	616.42
Soggetti	Pathology Cancer - Surgery Oncology Surgery Surgical Oncology General Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction to Lymph Node Pathology -- Diagnostic Methods -- The Normal Lymph Node -- Benign Lymph Node Conditions -- Nomenclature and Classification of Lymphomas -- Precursor Lymphoid Neoplasms -- Mature B-cell Neoplasms -- Mature T- and NK-cell Neoplasms -- Hodgkin Lymphoma -- Immunodeficiency-associated Lymphoproliferative Disorders -- Granulocytic, Histiocytic and Dendritic Cell Neoplasms.
Sommario/riassunto	Lymph node pathology is a complex and rapidly evolving field that requires integration of morphologic findings with a number of ancillary studies, as well as clinical information, to diagnose neoplastic and non-neoplastic hematopoietic disorders. Lymphomas are currently classified according to the 2016 revision of the World Health Organization (WHO) Classification, which emphasizes, and for some diagnoses mandates, the integration of clinical information in diagnostic decision making. Successful collaboration and teamwork between pathology and clinical specialties, especially hematology/oncology, are paramount for excellent patient care. In addition to diagnosis, pathology plays a

significant role in lymphoma prognostication and contributes to patient management and follow-up. Lymph Node Pathology for Clinicians provides a concise overview of different entities in lymph node pathology with the primary audience being clinicians. This text is intended as a quick reference for a clinician to become familiar with pathologic aspects of lymphomas and the thought process of a pathologist. Particular consideration is given to relevant diagnostic and prognostic ancillary studies. Organized with an interdisciplinary approach for effective management of lymph node disorders, this book aims to educate our clinical colleagues on the most important aspects of lymph node pathology.
