

1. Record Nr.	UNINA9910337516803321
Titolo	Radiation oncology : a case-based review // edited by Gokhan Ozyigit, Ugur Selek
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-97145-X
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (xiv, 500 pages) : illustration
Disciplina	615.842
Soggetti	Radiotherapy Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Central Nervous System Tumors -- Head and Neck Cancers -- Thoracic Malignancies -- Breast Cancer -- Gastrointestinal System Cancers -- Genitourinary Cancers -- Gynecological Cancers -- Sarcomas -- Lymphomas.
Sommario/riassunto	This book is an evidence-based guide to current use of radiation therapy for the treatment of malignancies at major disease sites. It is designed to meet the needs of residents, fellows, and practicing radiation oncologists and will assist in selection and delineation of tumor volumes/fields and dose prescription for intensity-modulated radiation therapy, including volumetric modulated arc therapy for stereotactic radiosurgery or stereotactic body radiotherapy. Each tumor site-related chapter presents, from the perspective of an academic expert, informative cases at different stages in order to clarify specific clinical concepts. The coverage includes case presentation, a case-related literature review, patient preparation, simulation, contouring, treatment planning, image-guided treatment delivery, follow-up, and toxicity management. The text is accompanied by illustrations ranging from slice-by-slice delineations on planning CT images to finalized plan evaluations based on detailed acceptance criteria. The expert knowledge and evidence contained in this comprehensive book will give readers the confidence to manage common cancers without outside referral and to meet the clinical challenges faced in everyday

practice.
