

1. Record Nr.	UNINA9910337522703321
Titolo	Outpatient Regenerative Medicine : Fat Injection and PRP as Minor Office-based Procedures // edited by Mario Goisis
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-44894-3
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (319 pages)
Disciplina	617.95
Soggetti	Dermatology Plastic surgery Plastic Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Preface -- Part I: General aspects -- 1 Platelet-rich plasma : collection techniques and uses -- 2 Fat harvesting: the traditional methods -- 3 Micrograft: An innovative office technique -- 4 Nanograft -- 5 Adipose stem cells -- 6 Fat grafting plus PRP -- 7 Fillers plus PRP -- Part II: Face and body treatments -- 8 Temporal fossa -- 9 Forehead, glabella and crow's feet -- 10 Malar area -- 11 Tear trough -- 12 Nasolabial folds -- 13 Medical rhinoplasty -- 14 Marionette lines -- 15 Lips -- 16 Chin -- 17 Neck and décolleté -- 18 Hands -- 19 Breast augmentation -- 20 Gluteal augmentation and remodeling -- 21 Calf augmentation and remodeling -- 22 Complications -- Part III: Miscellany -- 23 Complementary treatments -- 24 Products.
Sommario/riassunto	This book is unique in focusing expressly on regenerative medicine in the aesthetic field. With the aid of more than 400 color pictures, it provides step-by-step descriptions of procedures that can be performed easily in the private practice. The number of people pursuing anti-aging and cosmetic procedures in order to achieve a youthful, healthy, or simply improved aspect is continually increasing. At the same time the available techniques and materials have undergone rapid innovation in terms of both safety and quality. The practitioner no longer looks just at the correction or camouflage of an unwanted feature but rather also aims to address the aging process

itself. Regenerative medicine appears to provide a unique and unlimited opportunity in this context. Autologous fat grafting, adipose-derived stem cells, and autologous platelet-rich plasma represent just some of the attractive options that can be used for volume restoration and facial rejuvenation.
