Modern Diagnosis in the Evaluation of Pulmonary Vascular Disease (Bankier, A., Dennie, C.) -- Chapter 18. Imaging of Acute Aortic Syndrome (Grist, T., Rubin, G.) -- Chapter 19. Pre-and Post Aortic Endovascular Intervention: What a Radiologist Needs to Know (Bley, T., Roos, J.) -- Chapter 20. Non-invasive Angiography of Peripheral Arteries (Leiner, T., Carr, J.).

Sommario/riassunto

This open access book focuses on diagnostic and interventional imaging of the chest, breast, heart, and vessels. It consists of a remarkable collection of contributions authored by internationally respected experts, featuring the most recent diagnostic developments and technological advances with a highly didactical approach. The chapters are disease-oriented and cover all the relevant imaging modalities, including standard radiography, CT, nuclear medicine with PET, ultrasound and magnetic resonance imaging, as well as imaging-guided interventions. As such, it presents a comprehensive review of current knowledge on imaging of the heart and chest, as well as thoracic interventions and a selection of "hot topics". The book is intended for radiologists, however, it is also of interest to clinicians in oncology, cardiology, and pulmonology.
