

1. Record Nr.	UNINA9910337528503321
Autore	Fansa Hisham
Titolo	Breast Reconstruction with Autologous Tissue // by Hisham Fansa, Christoph Heitmann
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-319-95468-7
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (196 pages)
Disciplina	618.190592
Soggetti	Surgery, Plastic Cancer - Surgery Gynecology Plastic Surgery Surgical Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction: Breast Anatomy -- General. Reconstructive Surgery: General Remarks on Breast Cancer -- Tumor Excision -- Breast Conserving Therapy (BCT) -- Oncoplastic Surgery -- Mastectomy -- Autologous Reconstruction -- Lipofilling -- Reconstruction of nipple and Areola -- Index.
Sommario/riassunto	This book describes the various techniques available for autologous breast reconstruction, be it breast conserving therapy (BCT) or reconstruction following total mastectomy with local and distant flaps. Divided into two parts, the first presents the anatomy of the breast and the general requirements with regard to this kind of surgery. In turn, the second addresses reconstructive breast surgery management. The authors present oncoplastic procedures for reconstructing the breast following small defects due to cancer or other conditions (BCT), as well as the use of microvascular free flaps, such as abdominal, thigh or gluteal-based flaps, for a complete reconstruction. Preventive reconstructive surgery and cutting-edge techniques, such as lipofilling or breast reconstruction together with lymph node transplantation, are also included. Written by leading international plastic surgeons and

combining step-by-step explanations and detailed illustrations, this book clearly demonstrates that reconstructive procedures can have aesthetic outcomes.
