

1. Record Nr.	UNINA9910337528803321
Titolo	Geriatric Ophthalmology : A Competency-based Approach / / edited by Hilary A. Beaver, Andrew G. Lee
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-04019-4
Edizione	[2nd ed. 2019.]
Descrizione fisica	1 online resource (XIV, 145 p. 40 illus., 32 illus. in color.)
Disciplina	617.7
Soggetti	Geriatric ophthalmology Vision Disorders Aged Eye Diseases Professional-Patient Relations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Scope of the Problem and Demographic Shift in Population: Visual Disease Incidence and Prevalence in the Elderly Population -- Refractive Error in the Geriatric Population.-C ataracts and Cataract Surgery -- Glaucoma in the Elderly -- Diabetic Retinopathy and Its Management -- Age-Related Macular Degeneration and Its Management -- Low Vision: When Vision Fails -- Visual Loss and Depression -- Visual Loss and Dementia -- Visual Loss and Hearing Loss -- Visual Loss and Falls -- Elder Abuse -- Functional Impairment and Visual Loss -- The Research Agenda-Setting Project (RASP) -- Screening for Comorbidities -- Refer Comorbidities -- Index .
Sommario/riassunto	Geriatric patients have unique responses to treatment and disease, often harboring co-morbidities that can impact evaluation, treatment, and prognosis, which can require specialized expertise or experience. Geriatric Ophthalmology, Second Edition draws upon the successful first edition by applying a competency-based approach to these patients, improving awareness, increasing understanding, and encouraging expertise about geriatric issues among eye care professionals. These intersecting conditions and their treatment are

comprehensively discussed in this fully updated second edition, complete with additional high-quality illustrations and photos. Each chapter utilizes illustrative cases to exemplify the points of care encompassed by the competencies. Topics of special interest are included, such as diabetic retinopathy, age-related macular degeneration, cataracts, glaucoma, diabetic retinopathy, low vision, all diseases of aging, and the effect of vision loss on the geriatric patient's quality of life. Medical students, residents, fellows, clinicians, and allied health personnel alike will find this to be a comprehensive resource and exceptional guide to the care of older patients with geriatric ophthalmology problems.
