Sommario/riassunto

This book constitutes selected papers from the 15th European,
 Mediterranean, and Middle Eastern Conference, EMCIS 2018, held in
 Limassol, Cyprus, in October 2018. EMCIS is dedicated to the definition
 and establishment of Information Systems as a discipline of high
 impact for the methodical community and IS professionals, focusing on
 approaches that facilitate the identification of innovative research of

significant relevance to the IS discipline. The 34 full and 8 short papers presented in this volume were carefully reviewed and selected from a total of 108 submissions. They were organized in topical sections named: blockchain technology and applications; big data and analytics; cloud computing; digital services and social media; e-government; healthcare information systems; IT governance; and management and organizational issues in information systems. .
