

1. Record Nr.	UNINA9910337591803321
Titolo	Energy and Environmental Strategies in the Era of Globalization // edited by Muhammad Shahbaz, Daniel Balsalobre
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-06001-2
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (440 pages)
Collana	Green Energy and Technology, , 1865-3529
Disciplina	333.7915 333.79
Soggetti	Energy policy Energy and state Natural resources Climate change Globalization Markets Pollution prevention Economic growth Energy Policy, Economics and Management Natural Resource and Energy Economics Climate Change Management and Policy Emerging Markets/Globalization Industrial Pollution Prevention Economic Growth
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book provides readers with cutting-edge techniques that can be applied to energy and environmental economics. Further, it highlights the effects that both globalization and economic growth have on the environment. In addition to offering a broader perspective on the relationship between environmental pollution, energy consumption and

economic growth, the book studies the relationship between economic growth and environmental damage by drawing on the theoretical hypothesis of the Environmental Kuznets Curve. The book presents new econometric techniques and innovative approaches to the study of the energy economy. Accordingly, it can be used to help analyse the current state of the energy economy, the environment and globalization, and can serve as a theoretical reference manual for doctoral students and academics seeking new analytical techniques. Chapter "How Total Factor Productivity Drives Long-Run Energy Consumption in Saudi Arabia" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.
