

1. Record Nr.	UNINA9910337604903321
Autore	Mohamed Khaled Salah
Titolo	The Era of Internet of Things : Towards a Smart World // by Khaled Salah Mohamed
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-18133-2
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (124 pages)
Disciplina	004.678
Soggetti	Electronic circuits Signal processing Microprocessors Computer architecture Electronic Circuits and Systems Signal, Speech and Image Processing Processor Architectures
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. The Era of Internet of Things: Towards a Smart World -- Chapter 2. IoT Physical Layer: Sensors, Actuators, Controllers and Programming -- Chapter 3. IoT Networking and Communication Layer -- Chapter 4. IoT Cloud Computing, Storage and Data Analytics -- Chapter 5. IoT Application Layer:Case Studies and Real Applications.
Sommario/riassunto	This book introduces readers to all the necessary components and knowledge to start being a vital part of the IoT revolution. The author discusses how to create smart-IoT solutions to help solve a variety of real problems. Coverage includes the most important aspects of IoT architecture, the various applications of IoT, and the enabling technologies for IoT. This book presents key IoT concepts and abstractions, while showcasing real case studies. The discussion also includes an analysis of IoT strengths, weaknesses, opportunities and threats. Readers will benefit from the in-depth introduction to internet of things concepts, along with discussion of IoT algorithms and architectures tradeoffs. Case studies include smart homes, smart

agriculture, and smart automotive. Provides readers with a comprehensive overview of IoT; Includes discussion of IoT algorithms and architectures tradeoffs; Uses real, industrial applications/case-studies to demonstrate concepts introduced.
