

1. Record Nr.	UNINA9910973932103321
Autore	Lawless Elaine J
Titolo	Women escaping violence : empowerment through narrative / / Elaine J. Lawless
Pubbl/distr/stampa	Columbia, : University of Missouri Press, c2001
ISBN	0-8262-1319-7 0-8262-6267-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (273 p.)
Disciplina	362.82/92/0973
Soggetti	Abused women - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 237-244) and index.
Nota di contenuto	Intro -- Contents -- Acknowledgments -- Prelude -- Prologue -- Introduction -- 1 Safe and Unsafe Living -- 2 Powerful Words -- 3 Describing the Unspeakable -- 4 Hearing Silence -- 5 Looking Back -- 6 Turning Points -- Conclusion -- Some of the Stories -- Sherry's Story -- Margaret's Story -- Teresa's Story -- Cathy's Story -- Notes -- Bibliography -- Index -- About the Author.
Sommario/riassunto	Bringing women's stories to the attention of the academy and to the reading public, Lawless (English and women's studies, U. of Missouri-Columbia) juxtaposes accounts by women who have escaped to shelters of the violence they have suffered, with feminist analysis of their narratives and of the healing power of voicing the experiences. c. Book News Inc.

2. Record Nr.	UNINA9910337617503321
Titolo	Software Engineering : Proceedings of CSI 2015 // edited by M. N. Hoda, Naresh Chauhan, S. M. K. Quadri, Praveen Ranjan Srivastava
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2019
ISBN	981-10-8848-9
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (XVIII, 724 p. 212 illus., 129 illus. in color.)
Collana	Advances in Intelligent Systems and Computing, , 2194-5365 ; ; 731
Disciplina	005.1
Soggetti	Software engineering Software engineering - Management Computer science Software Engineering Software Management Computer Science Logic and Foundations of Programming
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1: A Multi-Agent Framework for Context Aware Dynamic User Profiling for Web Personalization -- Chapter 2: Implementation of Equivalence of Deterministic Finite State Automation and Non-Deterministic Finite State Automaton in Acceptance of Type-3 Languages Using Programming Code -- Chapter 3: A Multi - Factored Cost and Code Coverage Based Test Case Prioritization Technique for Object Oriented Software -- Chapter 4: A Novel Page Ranking Mechanism Based on User Browsing Patterns -- Chapter 5: Indexing of Semantic Web for Efficient Question Answering System -- Chapter 6: A Sprint Point Based Tool for Agile Estimation -- Chapter 7: Improving Search Results Based On Users' Browsing Behaviour Using Apriori Algorithm -- Chapter 8: Performance Efficiency Assessment for Software Systems -- Chapter 9: Impact of Programming Languages on Energy Consumption for Sorting Algorithms -- Chapter 10: Crawling Social Web With Cluster Coverage Sampling -- Chapter 11: Efficient Management of Web Data by Applying Web Mining Pre-processing Methodologies.
Sommario/riassunto	This book presents selected proceedings of the annual convention of

the Computer Society of India. Divided into 10 topical volumes, the proceedings present papers on state-of-the-art research, surveys, and succinct reviews. They cover diverse topics ranging from communications networks to big data analytics, and from system architecture to cyber security. This book focuses on Software Engineering, and informs readers about the state of the art in software engineering by gathering high-quality papers that represent the outcomes of consolidated research and innovations in Software Engineering and related areas. In addition to helping practitioners and researchers understand the chief issues involved in designing, developing, evolving and validating complex software systems, it provides comprehensive information on developing professional careers in Software Engineering. It also provides insights into various research issues such as software reliability, verification and validation, security and extensibility, as well as the latest concepts like component-based development, software process models, process-driven systems and human-computer collaborative systems.
