Sommario/riassunto	This volume of Eurasian Studies in Business and Economics includes selected papers from the 24th Eurasia Business and Economics Society

(EBES) Conference, held in Bangkok. The theoretical and empirical papers gathered here cover diverse areas of economics and finance from different geographic regions; yet the main focus is on the latest findings on labor markets and their interactions with competitive environments. The volume also includes meso-economic studies that analyze individual companies, economic and financial environments, particularly with regard to human resource and financial risk management.
