Sommario/riassunto	This book is an integrated series of philosophical investigations that offers significant new insights into key philosophical concerns ranging from methodological issues to substantive doctrines. Consisting of three sections, it first deals with the nature of philosophizing itself and seeks to illustrate the project from the angle of the pragmatic tradition. The second section is devoted to issues of knowledge and how the cognitive project goes about producing results that are cogent and objective. The third and closing section considers how the ideas and

perspectives of these considerations can be applied and implemented  
in various matters of personal judgment and practice.
