	Social sciences
	Humanities
	History of Philosophy
	Epistemology
	Humanities and Social Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This volume presents, for the first time in English, Husserl's seminal 1923/24 lecture course First Philosophy (Erste Philosophie) together with a selection of material from the famous research manuscripts of the same time period. The lecture course is divided into two systematic, yet interrelated parts ("Critical History of Ideas" and "Theory of the Phenomenological Reduction"). It has long been recognized by scholars as among the most important of the many lecture courses he taught in his career. Indeed it was deemed as crucially important by Husserl himself, who composed it with a view toward eventual publication. It is unsurprising, then, that First Philosophy is the only lecture course that is consistently counted among his major works. In addition to furnishing valuable insights into Husserl's understanding of the history of philosophy, First Philosophy is his most sustained treatment of the

phenomenological reduction, the central concept of his philosophical methodology. The selection of supplemental texts expands on the topics treated in the lectures, but also add other themes from Husserl's vast oeuvre. The manuscript material is especially worthwhile, because in it, Husserl offers candid self-criticisms of his publicly enunciated words, and also makes forays into areas of his philosophy that he was loath to publicize, lest his words be misunderstood. As Husserl's position as a key contributor to contemporary thought has, with the passage of time, become increasingly clear, the demand for access to his writings in English has steadily grown. This translation strives to meet this demand by providing English-speaking readers access to this central Husserlian text. It will be of interest to scholars of Husserl's work, non-specialists, and students of phenomenology.

	Nota di contenuto	Introduction : northern exposure -- Stone-worlds -- Houses, land and soil -- Forests and hunting -- Coastal landscapes and the sea -- Boats and waterways -- River mouths and central places -- Birds and cosmology -- The sun, light and fire -- Epilogue
	Sommario/riassunto	"In its analysis of the archaeologies and histories of the northern fringe of Europe, this book provides a focus on animistic-shamanistic cosmologies and the associated human-environment relations from the Neolithic to modern times. The North has fascinated Europeans throughout history, as an enchanted world of natural and supernatural

marvels: a land of light and dark, of northern lights and the midnight sun, of witches and magic, and of riches ranging from amber to oil. Northern lands conflate fantasies and realities. Rich archaeological, historical, ethnographic and folkloric materials combine in this book with cutting-edge theoretical perspectives drawn from relational ontologies and epistemologies, producing a fresh approach on the prehistory and history of a region that is pivotal to understanding Europe-wide processes, such as Neolithization and modernization. This book examines the mythical and actual northern worlds, with northern relational modes of perceiving and engaging with the world on the one hand and the 'place' of the North in European culture on the other. This book is an indispensable read for scholars of anthropology and folklore in northern Europe, as well as those with an interest in the political and geographical conflicts that can occur in this region. It provides a deep-time understanding of globally topical issues and conflicting interests, as expressed by debates and controversies around Arctic resources, nature preservation, and indigenous rights"--
