Ultimate Destination -- Chapter 15. Universal Law -- Chapter 16. Spatial and Temporal Expanses. This book explores three worlds shared by the humans in their Sommario/riassunto collective experiences. It identifies and explores the world of

commonsense, the world of religion, and the world of science as three

essential dimensions of human experience. The book helps understand that humans can gain comfort and pleasure in commonsense, achieve meaning and purpose from religion, and attain truth and rationality through science. It actively applies theories to and develops theoretical explanations from different domains or situations of human existence. This book is of interest to theorists, researchers, instructors, and students across major academic disciplines in the humanities and social sciences.
