Autore	O'Hare William P
Titolo	Differential Undercounts in the U.S. Census : Who is Missed? // by William P. O'Hare
Pubbl/distr/stampa	2019 Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	9783030109738 3030109739
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (xi, 167 pages) : illustrations, charts
Collana	SpringerBriefs in Population Studies, , 2211-3223
Classificazione	MAT029000SOC006000SOC019000
Disciplina	304.6 353.00819
Soggetti	Demography Population Statistics Sociology - Methodology Population and Demography Statistical Theory and Methods Sociological Methods
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	1. Introduction -- 2. Why the Census is Important -- 3. How Do We Know Who is Missed in the Census? -- 4. The Big Picture on Census Undercount Differentials -- 5. Differentials by Age -- 6. Differentials by Sex -- 7. Differentials by Hispanic Origin Status -- 8. Census Coverage of the Black Population -- 9. Census Coverage of American Indians and Alaskan Natives -- 10. Coverage of Asians -- 11. Census Coverage of Native Hawaiians and Other Pacific Islanders -- 12. Renters and Owners -- 13. Data on Other groups at risk of being undercounted -- 14. Attempts to Reduce/Eliminate Differential Census Undercounts -- 15. Looking toward the 2020 Census.
Sommario/riassunto	This open access book describes the differences in US census coverage, also referred to as "differential undercount", by showing which groups have the highest net undercounts and which groups have the greatest

undercount differentials, and discusses why such undercounts occur. In addition to focusing on measuring census coverage for several demographic characteristics, including age, gender, race, Hispanic origin status, and tenure, it also considers several of the main hard-to-count populations, such as immigrants, the homeless, the LGBT community, children in foster care, and the disabled. However, given the dearth of accurate undercount data for these groups, they are covered less comprehensively than those demographic groups for which there is reliable undercount data from the Census Bureau. This book is of interest to demographers, statisticians, survey methodologists, and all those interested in census coverage.
