Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Book Cover; Title; Copyright; Contents; Figures; Tables; Contributors; The economics of sustainable tourism: An overview; Part I Tourism demand and the host community; 1 Time series modelling of tourism demand from the United States, Japan and Malaysia to Thailand; 2 Determinants of tourist satisfaction at sun and sand mass destinations; 3 Determinant attitudes to tourism in a mass tourist destination: A comparative-static analysis; 4 A panel data analysis of residential water demand in a Mediterranean tourist region: The case of Sardinia; Part II Tourism and productivity 5 Pollution-averse tourists and growth 6 On the relationship between tourism and trade; 7 Evaluating labour productivity of diversifying rural tourism: Evidence from Japan; Part III Sustainable tourism: Environment and cultural heritage conservation; 8 Clustering tourism destinations by means of composite indices of sustainability; 9 Equilibrium dynamics and local indeterminacy in a model of sustainable tourism; 10 How

tourism can help preserve cultural heritage sites: Constructing optimal entrance fee schemes to collect visitors' WTP for the World Heritage Site My Son in Vietnam

The economics of sustainable tourism: Summary and suggestions for future researchIndex

Sommario/riassunto

Tourism is one of the world's largest industries and one of its fastest growing economic sectors helping to generate income and employment for local people. At the same time, it has many negative outsourced effects on the environment and local culture. Achieving a more sustainable pattern of tourism development is high on the global agenda aiming to meet human needs while preserving the environment now and for the future. The Economics of Sustainable Tourism aims to critically explore how tourism economic development can move closer to a sustainable ideal from a firm economic

#### Sommario/riassunto

This new collection of essays follows in the footsteps of the successful volume *Thinking Ahead - Essays on Big Data, Digital Revolution, and Participatory Market Society*, published at a time when our societies were on a path to technological totalitarianism, as exemplified by mass surveillance reported by Edward Snowden and others. Meanwhile the threats have diversified and tech companies have gathered enough data to create detailed profiles about almost everyone living in the modern world - profiles that can predict our behavior better than our friends, families, or even partners. This is not only used to manipulate peoples' opinions and voting behaviors, but more generally to influence consumer behavior at all levels. It is becoming increasingly clear that we are rapidly heading towards a cybernetic society, in which algorithms and social bots aim to control both the societal dynamics and individual behaviors. However there are also silver linings: most of the threats that have accumulated over the past years have been identified and regulations are on the way to being introduced. Furthermore, entirely novel approaches based on blockchain technology and other developments derived from complexity science offer the possibility of entirely redefining collective trust and building platforms to support our core societal values. This book conveys an encouraging vision of the future and provides a sketch of how it may look: The road to digital enlightenment is still open, but it needs to be taken now.
