#### Sommario/riassunto

This book explores diverse contemporary paradigms of educational praxis and learning in Latin America, both formal and non-formal. Each contributor offers a unique perspective on the factors which lead to the production of paradigms rooted in 'other' logics, cosmologies, and realities, and how these factors may renegotiate and redefine concepts of education, learning, and knowledge. The various chapters provide a road map for scholars, activists, artists, students, organizations, and social movements to help begin to construct learning spaces that seek to engage with a new more horizontal form of participatory democracy.
